

OUR HOPE DEPENDS IN OUR BEAUTIFUL NATURE

ANNUAL REPORT (4th report) 2020

**KKM
Nagamuthupillai Green Promotion Center**

Total Expected Outcomes	05
Total activities has been completed	603
Total beneficiaries participated in programs	1967

Vasana lives in Malayalapuram village near Kilinochchi. The Project team from the Nagamuthu Pillai Green Promotion Center visited this village to promote the importance of country green leaves. Following the meeting Vasana went home and she started distributing country green leaves nursery plants to others in the village. She has also donated 24 plants to the Green Promotion Center for distribution to needy people.

ACHIEVEMENTS OF THE YEAR 2020

Proposed outcome in proposal	Achievements	Means of verification	Evidence
We will get the natural self-growing vegetables from our environment and use our self-creation to cook fresh tasty food.	Green promotion center land maximum cultivated green leaves & other plants	Videos	Click here
Community with children will go to always respect, treasure and preserve our mother nature's gift to us.	More than five hundred stories has been collocated by project team & some stories presented previous report .Now some stories printed as book.	Story book	Click here
Community with children will go to reduce the cost of living by using the natural resources from our own surroundings.	More than 6070 green leaves plants has been plated among 572 family's home land.	Videos	Click here
Community with children will go to will increase our revenue and have stress free life.	46 families has come forwarded said about their money saving experience.	Report	Each progress report presented
Community will going to will use our hard-earned money wisely	46 families has come forwarded said about their money saving experience.	Report	Each progress report presented

OUR GREEN DREAMS

Our beautiful Sri Lanka has rich in natural resources, with self-grown vegetables and fruits in our own surroundings. This is a gift and a boon from Mother Nature to us which has more healthy values than organic productions. The community has identified **26** varieties of natural, native, edible plants, vegetables, yams, and fruits in our own gardens. **Which is a worry-free gift to us.** Our ancestors discovered these self-growing edible plants. They survived on these plants and lived a long happy, stress free healthy life. We have inherited these valuable food habits from them. We will respect our soil, preserve, and nurture the self-growing plants for our future generation. Our community is neglecting, and ignoring this gift of Mother Nature's own blood and nutritious values given to us. They are trying to live on ready-made, preserved food and junk food. KKM has helped the community to the next level of promoting healthy well-being lifestyle. We

have to trained, conducted workshops on self-growing edible plants to the communities and chosen **10** enthusiastic ambassadors as leaders to respect, promote and preserve the natural healthy life style in northern district of Sri Lanka.

In **2020** our 518 Ambassadors has been lead the community inspiring, motivating and sharing their experiences to survive on self-growing vegetables and fruits for healthy life style. As we hope 518 Ambassadors in **2020** to valued and promoted this healthy project in 28 villages Northern & Eastern provinces. This project has been made possible by the benevolence of the **Shanthi Selvakumar family descendants of late Chairman Nagamuthu Pillai.**

“Best things in life are free And“ A great example of that are self-growing plants by NAGAMUTHU PILLAI Green leaves project”

A STORY HAS COME FROM 'CHAIRMAN ILLAM'

Iynkaran Iynkaran lives with his family in Katpulam village. They live below the official poverty line. With the support of Kaveri Kala Mmanram (KKM) and donations received from ACT International, Iynkaran acquired two larchams of land to build a small house. Iynkaran was always keen to do farming but he did not have the land to the farming. When 'Chairman Illam' (vacant house belonging to the former chairman of the local council) became available to the KKM project team, Iyankran volunteered to make use of the land surrounding

the house for cultivation. Iynkaran and his family first planted 1000 Cassava plants in this land. Within ten months he harvested and got 3290 Kg of Cassava from this cultivation. The income was approximately LKR 164,500.

He was able to use this money to settle previous loans. He was also able to use some of the money for his daughter's higher education. She is now studying Advance level.

Iyangaran and the KKM project team also distributed 10,000 Cassava sticks to 25 other families.

In addition, the land was also used to grow and promote 'green leaves'.

This is how the Nagamuthupillai Green Promotion Center project was started.

THE DOOR OPENS FOR OUR FRIENDS ABROAD TO GET THE TASTE OF GREEN LEAVES.

The success of Nagamuthu Green Promotion Center encouraged Rev Joshua to establish The Green Hope Product Company in Kilinochchi in February 2020.

This company was set up by Rev Joshua with the support of Mr Thiruthanikainathan from UK. Its objective is to produce and promote 'green leaves products' in a small scale. The products of this company include 'Green leaves curry masala', 'Green leaves mixture' and 'Green leaf dry powders' for various cooking needs. Exporting these products abroad has already started.
